Govind Shankar Kumar

B.Tech Information Technology | Vellore Institute of Technology

Reg. No. 26BIT0286 | Bengaluru, Karnataka
govindshankarkumar@gmail.com | github.com/DokiDarth

PROFILE

B.Tech Information Technology student at VIT who has been coding since school. Certified by WhiteHat Jr as a Game Developer (2020) and a Full Stack Developer with AI app development skills (2021), and a prize winner at the CEL Kids Hackathon 2020. Enjoys turning ideas into working software, most recently a Smart Inbox that sorts and prioritises email with machine learning. Keen to keep building practical, well-designed products alongside strong academics.

PERSONAL DETAILS

FULL NAME	Govind Shankar Kumar	DATE OF BIRTH	11 August 2008 (Age 18)
HOMETOWN	Bengaluru, Karnataka	FAMILY	Parents, Vinod Kumar and Rekha Kumar
EMAIL	govindshankarkumar@gmail.com		

EDUCATION

B.Tech, Information Technology

Currently pursuing

Vellore Institute of Technology (VIT) | Reg. No. 26BIT0286

Academic forte: programming, logical problem-solving and building real applications end to end, from backend logic to the user interface.

Academic goal: a CGPA of 9.0 or above.

Senior Secondary (Class 12)

Passed 2026

HMR International School, Kalyan Nagar, Bengaluru | Central Board of Secondary Education (CBSE)

Physics, Chemistry, Mathematics and Computer Science.

INTERESTS: CURRICULAR

Programming & Full Stack Development

Building complete web applications, from the server and database to a clean, usable interface.

Artificial Intelligence & Machine Learning

Applying ML to everyday problems, such as classifying and ranking email by importance.

Game Development & UI/UX

Designing games and interfaces that are fun, intuitive and visually engaging.

INTERESTS: EXTRA-CURRICULAR

Sports: Football, Badminton & Basketball

I love playing football, badminton and basketball for the energy, teamwork and competitive spirit they bring. It keeps me active and fit, teaches me discipline and how to handle both wins and losses, and is a great way to refresh my mind away from the screen.

Rubik's Cubes

Solving Rubik's cubes sharpens my pattern recognition, memory and patience, and it is satisfying to keep getting faster with practice.

PROJECTS

Smart Inbox Prioritization System

VIT, 2026

Team project that ranks incoming email by importance. A Python engine (rules + scikit-learn) and a live web dashboard on Cloudflare Workers with Google sign-in, which syncs Gmail every five minutes and learns from thumbs-up/down feedback.

More projects on GitHub

github.com/DokiDarth

40+ repositories built since school, including real-time face and hand-gesture recognition, object detection, a Dog vs Human image classifier (Python), the Kwitter chat app, a Book Club web app, and browser games like Car Racing and Ping Pong.

HACKATHONS

CEL Kids Hackathon 2020 - 3rd Prize

March 2020

Won third prize in the hackathon organised by Code to Enhance Learning.

CERTIFICATIONS

WhiteHat Jr Certified Full Stack Developer

2021

Core programming skills, design thinking and advanced AI app development.

WhiteHat Jr Certified Game Developer

2020

Recognised for exceptional skills and outcomes in game development with deep UI/UX.

STRENGTHS

Hands-on builder
Learns best by making working projects.

Problem-solving mindset
Breaks problems down logically.

Early starter
Has been coding and competing since school.

Teamwork
Collaborates well on shared projects.

Attention to design
Cares about how software looks and feels to use.

Willingness to learn
Picks up new tools and technologies quickly.

GOALS

SHORT TERM

- Academic excellence: CGPA of 9.0+
- Compete in more hackathons at VIT and beyond
- Grow the Smart Inbox into a polished, shareable product
- Confident communication and public speaking

LONG TERM

- A career in software engineering and AI
- Build products that make people's work easier
- A strong network of ambitious, like-minded people
- Continuous learning and personal growth
